# MULTI-TABLE

Material processing and metal separation system

## Benefits

### Compact & Mobile Design

- Small footprint and lightweight build—ideal for tight spaces.

### Eco-Friendly & Safe Operation

- Runs clean and quiet with integrated dust control, minimal energy use, and operator-friendly access points.

### Exclusive USA Distribution

- Your trusted U.S. partner for Guidetti's Multi Table Series—delivering global technology with local knowledgeable support.

## Key Features

### All-in-One Separation

- Single-system densimetric separation is ideal for copper and aluminum recovery from electrical wire. An integrated trommel pre-sizes material for precise separation—maximizing yield and revenue from every pound.

### Operator Friendly

- Touchscreen HMI or clearly labeled manual controls walk operators through every function.
- LED indicators and simple alerts make system conditions easy to understand.
- No cryptic codes—just clear, actionable messages.
- Quick to learn, easy to run—reduces errors and operator fatigue.

### Continuous Processing

- Engineered for nonstop operation, seamlessly integrates into full
