ROBI SEPARATION TABLE

Precision separation for maximum metal recovery

Benefits

User-Friendly

- Equipped with an HMI and PLC-controlled system and designed for easy and fast filter cleaning.

Eco-Friendly & Low Maintenance

- Operates without releasing pollutants into the atmosphere, maintains low noise levels (~81 dB), and consumes minimal energy

Exclusive USA Distribution

- Your trusted U.S. partner for Guidetti's Robi Table Series—delivering global technology with local knowledgeable support.

Key Features

Advanced Dry Separation Technology

- Utilizes vibrating densimetric separation to efficiently sort materials of like size particles but differing densities
- LED indicators and simple alerts make system conditions easy to understand.

Adjustable Parameters

- Features adjustable table inclination, vibration frequency, and air input to optimize separation efficiency.

Continuous Operation

- Designed for seamless integration into recycling processes, ensuring consistent performance.

Versatile Recovery Applications

- Recovery of metals from electric wire(e.g., separating copper and aluminum from PVC or rubber).
